

Engineered Piping Products Ltd.

Expansion Joint Refurbishment & Field Services

**Metal
Expansion Joints**

Rubber Expansion Joints

**Penstocks
& Valves**

Engineered Piping Products supplies high quality metal expansion joints and hoses in stainless steel and other exotic materials along with an extensive range of cylindrical/rectangular fabric and rubber expansion joints for the petrochemical, power and process industries.

Through working in close consultation with our clients, our broad-based and wide-ranging experience enables us to provide an efficient service. Client requirements are met through dynamic design solutions and cost-effective engineering product supply.

We also offer comprehensive all-round packages, covering:

- Engineering design
- Project management
- Field installation supervision
- Expansion joint inspection services

In addition to the above we also offer on-site personnel such as welders, pipe fitters, boiler makers/steel fabricators and any other installation services required.
